**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 6-11 and 13-14 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

In applicant's independent claims 6 and 10, the newly added recitation of "wherein said rotation of each light guide is performed independently of any movement of the light guide's corresponding light source" was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

In applicant's amendment and remarks filed on 11/10/10, applicants argue that the newly amended claims are fully supported by applicant's original disclosure and refer to figures 3a-3c and 5 as illustrating that the light source is distinct from the light guide and thus rotation of the light guide does not result in any movement of the light source.

The examiner disagrees. Paragraph 20 of applicant's specification clearly states that illumination unit 4 comprises two light sources 9 per light guide 6. Paragraph 25 further supports the disclosure of paragraph 25 by stating "Each of the illumination units 4 comprises a longitudinal light guide with a light source 9 on each of both ends of the light guides." In paragraph 23 of applicant's specification, applicants specifically disclose "Returning to figure 2, it is stressed that the **illumination units 4** can be rotated along the longitudinal axis as indicated by the arrows."

Thus, applicant's original disclosure only supports that the illumination unit which includes a light guide and light source rotates as a whole unit. There is no support in applicant's original disclosure that rotation of the light guide does not result in any movement of the light source.

***Allowable Subject Matter***

Claims 15-17 allowed.

***Response to Arguments***

Applicant's arguments with respect to claims 6-11 and 13-14 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
